Contents of volume 199

No. 1: 1–62 published July 14, 1990
No. 2: 63–121 published October 4, 1990
No. 3: 123–188 published October 30, 1990
No. 4: 189–250 published November 11, 1990
No. 5: 251–314 published December 22, 1990
No. 6: 315–376 published February 19, 1991
No. 7: 377–436 published March 18, 1991
No. 8: 437–494 published April 17, 1991

Abbadie C → Boucher D
Angelier N → Moreau N
Anstrom JA, Mackie EJ, Tucker RP: Immunohistochemical localization of a tenascin-like extracellular matrix protein in sea urchin embryos 169

Bate M → Broadie KS
Beck H → Hackstein JHP
Beetschen J-C → Shi D-L
Biliński SM: Are accessory nuclei involved in th establishment of developmental gradients in hymenopteran oocytes? Ultrastructural studies 423
Bohrmann J: In vitro culture of *Drosophila* ovarian follicles: the influence of different media on development, RNA synthesis, protein synthesis and potassium uptake 315
Boucaut J-C → Shi D-L
Boucher D, Loones M-T, Pyne CK, Simon F, Abbadie C, Charlemagne J, Lacroix J-C: Immunolocalization of a nuclear protein bound to the sphere organelle during oogenesis and embryogenesis in *Pleurodeles waltl* 458
Brennan S, Savage R: Embryonic transcriptional activation of a *Xenopus* cytoskeletal actin gene does not require a serum response element 89
Broadie KS, Bate M, Tublitz NJ: Quantitative staging of embryonic development of the tobacco hawkmoth, *Manduca sexta* 327
Brock HW → McKeon J
Bruijn WC de → Zivkovic D
Bruinooge E → Otte AP

Charlemagne J → Boucher D
Coulon-Bublex M, Dorel C: The arrest of embryogenesis at gastrula stage in the diapausing silkworm *Bombyx mori* is related to the synthesis of protein P61 469
Créton R → Zivkovic D

Daguzan C → Shi D-L
Delarue M → Shi D-L
Denburg JL → Norbeck BA
Dohmen MR → Zivkovic D
Dorel C → Coulon-Bublex M
Dorresteijn AWC: Quantitative analysis of cellular differentiation during early embryogenesis of *Platynereis dumerilii* 14
Driel R van → Otte AP
Duchaine J, Levasseur S, Vincent M: Expression of a complex developmental antigen in precise morphogenetic processes during chick embryogenesis 80
Durston AJ → Otte AP

Freeman G, Ridgway EB: Cellular and intracellular pathways mediating the metamorphic stimulus in hydrozoan planulae 63
Fu Y → Shiokawa K
Fujiwara A, Yasumasu I: Pulse treatment of sea urchin embryos with A23187 blocks their hatching out 212
Fujiwara S, Satoh N: An 83-kDa embryonic-type nuclear antigen is detected within the germinal vesicles of oocytes of the ascidian *Halocynthia roretzi* 207
Fujiwara S → Makabe KW

Galli B → Kistler A
Gerhart JC → Stewart RM
Gutzeit HO → Wenzel F

Hackstein JHP, Beck H, Hochstenbach R, Kremer H, Zacharias H: Spermatogenesis in *Drosophila hydei*: a genetic survey 251
Hays AR, Raikhel AS: A novel protein produced by the vitellogenic fat body and accumulated in mosquito oocytes 114
Held LI Jr: Arrangement of bristles as a function of bristle number on a leg segment in *Drosophila melanogaster* 48
Held LI Jr: Sensitive periods for abnormal patterning on a leg segment in *Drosophila melanogaster* 31
Hochstenbach R → Hackstein JHP
Holzenburg G → Müller WA
Hornbruch A → Richardson MK
Hosokawa K → Shiokawa K
Howard L → Spiegel E
Howe CC → Latham KE

Infante AA → LeBlanc JM

Jacobson M → Klein SL
Javois LC, Tombe VK: Head activator does not qualitatively alter head morphology in regenerates of *Hydra oligactis* 402

Kiene B, Wedlich D: EMA, an epithelial membrane-associated antigen during early development and morphogenesis of *Xenopus laevis* 164
King P → Whitington PM
Kistler A, Galli B, Kuhn H: Retinoic acid-induced cartilage degradations is caused by cartilage cells 377
Klein SL: *Xenopus* dorsal pattern formation is lithiumsensitive 427
Klein SL, Jacobson M: In vitro evidence that interactions between *Xenopus* blastomeres restrict cell migration 237
Klingmann G → Leitz T
Knust E → Tepaß U
Koch PB, Nijhout HF: Color pattern specific proteins in black scales in developing wings of *Precis coenia* Hübner (Nymphalidae, Lepidoptera) 289
Kremer H → Hackstein JHP
Kroiher M, Plickert G, Müller WA: Pattern of cell proliferation in embryogenesis and planula development of *Hydractinia echinata* predicts the postmetamorphic body pattern 156
Kuhn H → Kistler A
Kuwana T → Suzuki AS

Lacroix J-C → Boucher D
Lange RG → Leitz T
Lange RG → Müller WA
Latham KE, Howe CC: SPARC synthesis in pre-implantation and early post-implantation mouse embryos 364
Lautredou N → Moreau N
LeBlanc JM, Infante AA: Endoplasmic reticulum associated glucose-6-phosphatase activity is developmentally regulated and enriched in microsomes of endo/mesoderm in sea urchins 102
Ledsham IM → Sanders EJ
Leitz T, Klingmann G: Metamorphosis in *Hydractinia*: studies with activators and inhibitors aiming at protein kinase C and potassium channels 107
Leitz T, Lange RG: A substance released by metamorphosing larvae and young polyps of *Hydractinia echinata* induces metamorphosis in conspecific larvae 370
Levasseur S → Duchaine J
Loones M-T → Boucher D

Mackie EJ → Anstrom JA
Makabe KW, Fujiwara S, Saiga H, Satoh N: Specific expression of myosin heavy chain gene in muscle lineage cells of the ascidian embryo 307
Marmaras VJ → Tsakas S
Mathog DR: Suppression of abdominal legs in *Drosophila melanogaster* 449
Matsuda J → Suzuki AS
McKeon J, Brock HW: Interactions of the *Polycomb* group of genes with homeotic loci of *Drosophila* 387
Meier T → Whitington PM
Miyagawa J → Suzuki AS
Moreau N, Angelier N, Lautredou N: Relocalization of an 82-kDa protein from lampbrush loops into the nucleoskeleton during amphibian oogenesis 181
Müller WA, Lange RG, Holzenburg G: Pulses of ammonia and methylamine induce down-regulation of nematocyte and nerve cell populations in Hydrozoa (*Hydra; Hydractinia*) 123
Müller WA → Kroiher M

Nijhout HF → Koch PB
Norbeck BA, Denburg JL: Pattern formation during insect leg segmentation: studies with a prepattern of a cell surface antigen 493

Otte AP, Bruinooge E, Driel R van, Vente J de, Durston AJ: Cyclic GMP is not involved in neural induction in *Xenopus laevis* 97

Panagopoulou M → Zagris N
Plickert G → Kroiher M
Poodry CA, Woods DF: Control of the developmental timer for *Drosophila* pupariation 219
Pyne CK → Boucher D

Raikhel AS → Hays AR
Richardson MK, Hornbruch A: Quail neural crest cells cannot read positional values in the dorsal trunk feathers of the chicken embryo 397
Ridgway EB → Freeman G
Riou J-F → Shi D-L

Saiga H → Makabe KW
Sanders EJ, Zalik SE, Schneider WJ, Ledsham IM: The endogenous lectins of the chick blastoderm are present in association with an apolipoprotein in distinct organelles and in the extracellular matrix 295
Satoh N → Fujiwara S
Satoh N → Makabe KW
Savage R → Brennan S
Schierenberg E → Schlicht P
Schlicht P, Schierenberg E: Altered establishment of cell lineages in the *Caenorhabditis elegans* embryo after suppression of the first cleavage supports a concentration-dependent decision mechanism 437
Schneider WJ → Sanders EJ
Serras F, Speksnijder JE: F-Actin is a marker of dorsal induction in early *Patella* embryos 246
Shi D-L, Beetschen J-C, Delarue M, Riou J-F, Daguzan C, Boucaut J-C: Lithium induces dorsal-type migration of mesodermal cells in the entire marginal zone of urodele amphibian embryos 1
Shiokawa K, Fu Y, Hosokawa K, Yamana K: Temporally uncontrolled expression of linearized plasmid DNA which carries bacterial chloramphenicol acetyltransferase gene with *Xenopus* cardiac α-actin promoter after injection into *Xenopus* fertilized eggs 174
Simon F → Boucher D
Sommer R, Tautz D: Asynchronous mitotic domains during blastoderm formation in *Musca domestica* L. (Diptera) 373
Speksnijder JE → Serras F
Spiegel E, Howard L, Spiegel M: The contractility of elongated microvilli in early sea urchin embryos 228
Spiegel M → Spiegel E
Stewart RM, Gerhart JC: Induction of notochord by the organizer in *Xenopus* 341
Suzuki AS, Matsuda J: Neural-inducing activity and glycoprotein synthesis of newly mesodermalized ectoderm in the newt *Cynops* (Amphibia) 409
Suzuki AS, Miyagawa J, Kuwana T: Changes in the interior surface of newly mesodermalized ectoderm and its contact activity with competent ectoderm in the newt *Cynops* (Amphibia) 413

Tautz D → Sommer R
Tepaß U, Knust E: Phenotypic and developmental analysis of mutations at the *crumbs* locus, a gene required for the development of epithelia in *Drosophila melanogaster* 189
Tombe VK → Javois LC
Tsakas S, Marmaras VJ: Detection of haemocyte proteins in the integument of the developing Mediterranean fruit fly *Ceratitis capitata*. Evidence that certain haemocyte proteins serve as tyrosine carriers 281
Tublitz NJ → Broadie KS
Tucker RP → Anstrom JA

Vente J de → Otte AP
Vincent M → Duchaine J

Wedlich D → Kiene B
Wenzel F, Gutzeit HO, Zissler D: Morphogenesis of the micropylar apparatus in ovarian follicles of the fungus gnat *Bradysia tritici* (syn. *Sciara ocellaris*) 146
Whitington PM, Meier T, King P: Segmentation, neurogenesis and formation of early axonal pathways in the centipede *Ethmostigmus rubripes* (Brandt) 349
Woods DF → Poodry CA

Yamana K → Shiokawa K
Yasumasu I → Fujiwara A

Zacharias H → Hackstein JHP
Zagris N, Panagopoulou M: Monensin inhibits the first cellular movements in early chick embryo 335
Zalik SE → Sanders EJ
Zissler D → Wenzel F
Zivkovic D, Créton R, Zwaan G, Bruijn WC de, Dohmen MR: Polar localization of plasma membrane Ca^{2+}/Mg^{2+} ATPase correlates with the pattern of steady ionic currents in eggs of *Lymnaea stagnalis* and *Bithynia tentaculata* (Mollusca) 134
Zwaan G → Zivkovic D
